Submitter Type: Not specified

Source: Web Form

Overall Notes:

Clause

What is your position on the application

Position

I support the application

Notes

I support this application because (a) feral cats kill and eat native birds, their young, and their eggs, also native geckos, skinks, and insects. (b) they often live as close as they can to domestic dwellings in order to scavenge there. A half kilometer is still a long way away from domestic pets and should only infrequently be a problem. I would still support this application if the distance was reduced to 100 meters.

Clause

All submissions are taken into account by the decision makers. In addition, please indicate whether or not you also wish to speak at a hearing if one is held.

Position

No I do not wish to speak about my submission at the hearing
