Subject: Methyl bromide - time waiver request

Good Afternoon,

I will like to put our companies submission in for an extension on the MB time waiver out to October 2021. April of next year would appear to be insufficient time to effectively go through the reassessment process. As forest exports deal in letters of credit of up to 90 days we will need certainty that far in advance that we can export to markets that use MB as a phytosanitary treatment. Any disruption to this could have serious repercussions throughout the industry and the thousands of jobs that service it.

Thank you for consideration

JOHN GARDNER
Vessel Manager
