Subject: Submission Extension Request for Hydrogen Cyanamide Reassessment - Maori Kiwifruit Growers Incorporated

Kia ora Chris / [REDACTED],

Ngā mihi maioha o te wā ki a kōrua.

This is a formal request from Maori Kiwifruit Growers Incorporated for an extension of time for submissions for the Hydrogen Cyanamide Reassessment.

As stated on EPA's website, submissions close on 20 December 2021.

Māori Kiwifruit Growers Incorporated are requesting an extension of time for submissions, to ensure our growers are able to fully understand the implications of the proposals, carry out necessary research and drafting and respond accordingly within our grower trustees meeting cycle.

We are also interested in the toxicology studies commissioned by NZKGI and Zespri, which are due to be completed in 2022 to help furnish our submission.

Our request is that the submission closing date is moved out to April 6, 2022.

Appreciate your time to consider this.

Ngā mihi
