## Notes

Our whenua, waterways, atmosphere are already overburdened w bioaccumulated & latent ambient amounts of toxic biocides that adversely impact our people's wellbeing here in Heretaunga, the most fertile soils in the world. So many of our taonga tuku iho have vanished, & now our people have become the bioindicators. Legal frameworks favouring industry has not budgeted the offset costs of human health, miscarriages, failure to thrive infants and adults with suboptimal health that impacts on every facet of thier lives: whanau, sports, work days (productivity), longevity.
