## SECTION 67A AMENDMENT OF HSR101450

---

### Background

1. In August 2020, RB (Hygiene Home) New Zealand Limited lodged a release application for the insecticide product Mortein Powergard All in One Insect Killer (APP204116). During the processing of APP204116, the applicant was given the opportunity to comment on the draft controls set out in the decision document. The applicant replied with some suggestions, including the removal of “*spray only onto surfaces*” from the statements required on the label. The EPA agreed to this, and the label statement was removed from paragraph 5.7 in the EPA Staff Advice and ‘Table 2: Justification for section 77 changes to the prescribed controls’ in the EPA Decision document.
2. APP204116 was approved with controls in November 2020, and the application form and decision document were published in the HSNO applications register. The EPA then became aware that the label statement “*spray only onto surfaces*” had not been removed from the table ‘HSNO Additional Controls and Modifications to Controls’ in the appendix of the decision document in error. The applicant also questioned the discrepancy between the approval number in the decision document (HSR100450) and on the Approved hazardous substances with controls database (HSR101450). The latter is the correct approval number while the former was a typographical error.
3. The EPA considers that removing the label statement “*spray only onto surfaces*” from the table ‘HSNO Additional Controls and Modifications to Controls’ in the appendix of the decision document may be done via a technical amendment under section 67A of the HSNO Act.
4. The EPA considers that changing the approval number from HSR100450 to HSR101450 in the summary table of the decision document may also be done via a technical amendment under section 67A of the HSNO Act.

### Eligibility

5. The EPA considers that the amendments to the decision document fulfil the requirements of a technical amendment and may be done under section 67A of the HSNO Act.

### Amendment

6. The decision document for HSR101450 (APP204116) is proposed to be amended in the following ways:
  - The statement “*spray only onto surfaces*” should be removed from the table ‘HSNO Additional Controls and Modifications to Controls’ in the appendix of the decision document.

- The approval number should be changed to 'HSR101450' in the summary table of the decision document.

## Consideration

7. Pursuant to section 67A of the Act, I have considered the proposal to amend the decision document of HSR101450 (APP204116).
8. I am satisfied that this is a technical amendment. I have therefore amended the decision document.
