Dear Sally,

### Notification of timeframe waiver for APP204199

This letter is to advise you that we have extended the timeframe for the commencement of public notification, and that we have extended the timeframe for close of the public notification period for application APP204199, as per section 59 of the Hazardous Substances and New Organisms Act. These extensions relate to the application to reassess diazinon, fenamiphos and methamidophos.

The commencement of public notification has been extended until 09 September 2021 and the closing date for the public notification and submission period is extended to 08 November 2021.

We have decided that it is necessary to postpone these dates to account for the impact of the elevated Covid Alert levels in New Zealand on the ability of submitters to prepare material and engage with the submission process.

Section 59(4) of the HSNO Act provides that we must not extend a time period or waive a time requirement unless we are satisfied that:

- a) the applicant and the persons making submissions (if applicable) consent to that waiver; or
- b) any of those parties who have not so consented will not be unduly prejudiced.

We consider that no party is unduly prejudiced by this time waiver. However, if you consider that you or your organisation are unduly prejudiced, please let us know.

We confirm that, in line with section 59(5) of the HSNO Act, we will proceed with processing your application as soon as we are able to.

Please contact [REDACTED] on [REDACTED] or [REDACTED] if you wish to discuss this timeframe waiver or any other part of the application process further.

Yours sincerely

Clark Ehlers  
Hazardous Substances Reassessments Manager
