

Proposal for Amendment to an Approval form

Original approval details

Application code:	GMF99005
Application category:	To field test in containment any genetically modified organism under section 40 of the Hazardous Substances and New Organisms Act 1996
Applicant:	Scion
Purpose:	To field test, in the Bay of Plenty (Rotorua), over a period of 10 years, <i>Pinus radiata</i> and <i>Picea abies</i> plants genetically engineered in herbicide resistance. The total duration of this project is 11 years.
Date decision notified:	17 January 2001

Proposed amendment details

Applicant:	Scion
Date amendment application received:	27 November 2009

Description of minor or technical amendment:

To extend the duration of the approval (due to expire on 17 January 2010, excluding post-harvest monitoring) by eight years for the reason that further time is required to obtain the research objectives identified in the application.
