Hi Gen,

After much discussion we have decided not to submit the GPS co-ordinates for our fishing spots. The issue is that they will be published on the website for everyone to see. We feel these are private and not appropriate for the public domain. We spent time finding our spots and we also look after them so as not to deplete stocks.

We are prepared however to take someone from your team out to our spots so they can see for themselves the vast resources out there.

In the meantime I have plotted our fishing spots on one of the maps supplied by NIWA (which I have redrawn for clarity). Our spots in RED. The fish caught and shown in our video are from these spots.

Kind regards,  
Dee

Deanne L Werder-McCrea
