Subject: Unanswered question on Economics - reconciliation/audit trail not available
Categories: Responses to DMC Minute 43

Dear EPA,

My question JL10 remains unanswered. To be answered it requires uptake of Jason Leung Wai's offer – to 'go through his worksheets'. **How would this process occur?**

As I am unable to do the reconciliation, and can find no evidence that anyone else has done the calculations to make the figures reconcile – I think it important that the audit trail is provided.

Karen Pratt's Question:

JL10 Could you provide an audit trail, so readers of your report can reconcile Table 1 & Table 2 of the EPA Information Request to the figures in the Impact Assessment (see my non-expert evidence pages 93 and table page 96).

Jason's Response:

My report and the evidence report provides a clear description of the approach and the inputs into the modelling. This has been followed up with further information request to the EPA. I have also submitted my expert evidence and rebuttal evidence. Finally, the approach has been discussed by the expert witnesses who are comfortable with the process and the findings. **I am happy to go through my worksheets if required.**
