Notes

Detrimental effects to marine life and water chemistry. Adverse effects to marine food sources. Effects on environment, ecology, wildlife. The significant increased sediment dumpage may result in adverse surf effects/wave quality on Great Barrier Island. Long term cumulative effects and the potential for swells to be redirected regarding the proposal aren't sufficiently understood - they're based on 1/5 the amount of dumpage each year. It's the best right hand break in NZ when conditions are right.
