Notes

Decline Further exploration and drilling for fossil fuels is culturally, socially, environmentally and economically irresponsible. The risks from cumulative impacts on threatened marine mammals are unacceptable - the assessment is grossly inadequate. The effects of undisclosed harmful chemicals to be discharged at sea cannot possibly be assessed. Assessing related applications separately lacks transparency and does not allow overall assessment of cumulative impacts or integrated management of effects - the EEZ-CS Act s44 calls for joint processing and decision making on related applications. Climate change is real - New

Zealand has the obligation to deliver its commitment to the Paris Agreement under the UNFCCC and the EEZ-CS Act must be amended to include considerations of climate change. Stop drilling please
