Subject: Submission from <https://action.forestandbird.org.nz/tewaikoropupu/>

My submission:

I support the Forest & Bird submission to grant the application. In particular I support measures for the wider catchment which will protect:

- the water clarity and purity
- the scientific, ecological and biodiversity values
- habitat for indigenous flora and fauna
- cultural values
- wild, scenic and natural characteristics

My submission relates to all of the application. I support the application. I seek that the Special Tribunal recommends granting the order to the Minister of the Environment. I do not want to present my views at the public hearing.

 It's incredibly important that the Hearing Panel understand your personal views about Te Waikoropupū Springs. Please tell them below what's important to you:: I had the pleasure of visiting these springs earlier in the year, and it is a rare and magical place. I cannot understand how anyone could consider increasing irrigation in the area that feeds these springs when testing over the last two years is showing rising nitrate levels in the main spring.

How could you possibly risk any risk to this water quality, for the sake of a few more cows, and more intensification of the area. This is not the direction we should be going.

Please place more value on the springs than making a quick buck with more irrigation.

Regards,
Jack
