### Notes

These springs are so special - a wonder of the natural world. We should be doing all we can to protect them. Because of the nature of the springs, if we allow more take from the aquifer or pollution, we won't know for another 10 years what effect that will have on the springs. So therefore I also support the 5 key NIWA items to support the health of the aquifer. I always visit the springs when I go to Golden Bay and feel a deep respect and spiritual renewal after each visit. We are so blessed to have this wonder. Why even contemplate any application that could risk its well-being especially when we now know the sustainable and healthy methods of farming that will not risk such pollution.

### Clause

I/we seek the following recommendation from the Special Tribunal to the Minister for the Environment

### Position

Grant the order

### Notes

Recommend only sustainable and healthy methods of farming or not at all that will effect the aquifer

### Clause
