Notes

The amount of places where pre fresh water can be found is diminishing by the day. That makes these spring an increasing valuable resource and one that needs to be protected. If we do it right one day or could be the last pure water spring on the planet. As such it would be priceless. Therefore no matter what economic value you assign to the destruction of the spring it will never be as valuable as it will be if left untouched and protected. Save our spring. No commercial activities will be as valuable as leaving them untouched.

Clause

I/we seek the following recommendation from the Special Tribunal to the Minister for the Environment

Position

Grant the order
