As people living in this area and as farmers we need surety of our water supply. The term of six years offered is not workable, how can we plan and manage our businesses with no certainty of water? Any type of land use needs water surety. We do not have run off, we use our water efficiently, we try to farm sustainably with very few chemicals. Our water soaks into the ground and feeds house and stock water springs further down the valley. We too want a clean green New Zealand but in our region we need certainty of irrigation water.
