Support <input type="checkbox"/>	Neutral <input type="checkbox"/>	Oppose <input checked="" type="checkbox"/>
The reasons for my view(s) are:		
<p>These rules are an inefficient double-up of rules already existing in the Queenstown Lakes District Plan and will lead to additional costs and delays for applicants and the potential for different interpretation and implementation of standards between Otago Regional Council and Queenstown Lakes District Council.</p> <p>Already existing in the QLDC District Plan is Rule 25.5.11 which sets a permitted standard of exposed earth at 2,500m² or less where the slope is 10 degrees or greater and 10,000m² where the slope is less than 10 degrees.</p> <p>Earthworks setbacks from waterways are already covered in the Queenstown Lakes District Plan under Rule 25.5.19 with a 5m³ maximum permitted volume within 10m of the bed of any water body, drain or race within any consecutive 12 months.</p> <p>Additionally, QLDC already prescribes necessary compliance with the Erosion and Sediment Control Guide for Land Disturbing Activities in the Auckland Region (Auckland Council Guideline Document GD2016/005) (Rule 25.5.13) which is what ORC will use as a standard of good practice for earthworks.</p> <p>Overall, these additional rules will add unwarranted cost and delays to the residential subdivision industry for no apparent benefit. The industry is essential for employment generation and addressing housing shortages.</p>

<p>Delete Rules 14.5.1.1 and 14.5.2.1 and any other additional or consequential relief to Plan Change 8 including but not limited to issues, objectives, policies, rules, discretion, assessment criteria and explanations that will fully give effect to the matters raised in the submission.</p>
