Notes

I submit that the measures in the RPW should be carried over and included in the LWRP where relevant. Winter feeding and intensive farming of areas proximate to natural waterways is a significant cause of water pollution and a problem in our district. Setbacks from waterways must be mandated in areas which are classified as source areas for waterways. The distancing of setbacks should be cognisant of the intensity of grazing and the gradient of land adjacent to waterways. Intensive grazing should not be permitted in areas which are regarded as critical source regions. Farming activities must be cognisant of and required to operate within environmental tolerances.

Clause

The reasons form my view and/or any amendment(s) I am seeking are:

Notes

I support the major provisions of the Omnibus Plan, while asking for certain areas to be strengthened through a regulatory framework to ensure no further degradation of natural waterways and wetlands. There needs to be a programme of education for farmers, and then monitoring and implementation of regulations to support the transition to more sustainable farming. At the same time there needs to be financial support to encourage farmers to move away from intensive animal agriculture to crops that are lighter on the land and on our waterways.
