

## **Dam Structure**

- 1 The Consent Holder shall report to the council's assigned monitoring officer any visible signs of an algal bloom within Lake Waingaro.
- 2 The dam face and grassed spillway shall be maintained in a sward of grass and/or legume species, and shall not be grazed in such a manner as would result in erosion.
- 3 The Consent Holder shall submit to the council by 30 September of each year a report from a suitably qualified and experienced independent registered engineer on the performance and maintenance of the dam structure and ancillary equipment. All recommended remedial works outlined in an annual report shall be carried out promptly.
- 4 In addition to the annual reports required by Condition 17, a review of the safety and efficiency of the dam structure and ancillary equipment shall be undertaken at five yearly intervals by a suitably qualified and experienced independent registered engineer. The review report shall be for the preceding five year period ending 30 June. A copy of the review report shall be forwarded to the council by the following 30 September. Any recommended remedial works shall be carried out in accordance with the timeframe specified in the review report.
