---

Hi

I am wanting to comment on two points on the draft conditions that have been sent out.

112 - Vibrations

I am concerned as a homeowner at Lakeland Estate that the vibration and earthworks are going to be done between 6:30am and 08:00pm also I note that there was mention of night shifts from 08:00pm to 06:00am. So in some occasions if this happened it would be 24 hours a day.

I would also like to ask, is this work to be done from Monday to Friday only with no weekends? If there is weekend work being done, would this be on shortened hours?

If this was to happen I feel this would cause over tiredness and stress to myself and would affect my health. I would like to put forward that I feel this should be done from 8:00am to 06:30pm, Monday to Friday and also that there be no night work.

Also I would like to point out #64

I would like to ask that dust and anything else be blocked from coming onto my property. I worry that when the sections get developed and also get built on that I will have constant dust and if very windy could be materials coming on to our section. This is a big concern as I have my young grandchildren visit very often and this could stop them from being able to play outside.

So I would hope that there would be high protection put up and watering in place for this to stop it from being a problem.

I appreciate you taking the time to read my thoughts on this.

Kind Regards  
Patricia Patterson
