Fax: +64 3 321 9998

Report No: T6883

**CLIENT:** Sample Reception, Atkinson and Associates Veterinary Services, 53 Moa Street, Piopio 3912 .  
**CLIENT REFERENCE No.:** **Telephone No:** [REDACTED]  
**SAMPLES:** Three bovine tissue samples  
**REQUIREMENT:** Examine for fluoroacetate  
**RECEIVED:** 12 September 2018

Sample/s were received for analysis. The details were entered into the laboratory sample system and the sample/s given a reference number. The sample details and results are as follows:

**No. samples:** 3

LabNo.	Description	Fluoroacetate, µg/g
22047	Stomach contents, Rumen contents, Cow 1	1.43
22053	Stomach contents, Rumen contents, Cow 2	0.25
22055	Muscle tissue, Muscle, Cow 2	0.05

All results are reported to two significant figures.

The determination was carried out using TLM005, the assay of fluoroacetate in water, soil and biological materials by GLC. The method detection limit (MDL) is 0.001µg/g and the uncertainty (95% c.i.) is ± 9%.

**TESTED BY:** [REDACTED] **WORKBOOK REF:** 10/8  
**TEST PERIOD:** 18-20/9/18

**AUTHORISED BY:**

[REDACTED]

Date: 20/09/2018

*These results are confidential to the client and relate only to the samples as received and tested. This report may be reproduced in full only. The samples relating to this report will be disposed of after two months from the report date unless requested otherwise by the client. Where appropriate, the above results will be included in anonymised form in the National Vertebrate Pesticide Residue Database.*
