
DECISION TO REISSUE APPROVALS

Summary

Application type	To reissue an approval for a hazardous substance under clause 4 of Schedule 7 of the Hazardous Substances and New Organisms Act 1996 ("the Act")
Consideration date	2 December 2021
Consultation period	8 June 2020 – 4 August 2020
Number of submissions received	Twenty-eight during the public consultation
Considered by	The Chief Executive ¹ of the Environmental Protection Authority ("the EPA")
Decision	To reissue the 146 approvals listed in Appendix 1

¹ The Chief Executive of the EPA has made the decision on this application under delegated authority in accordance with section 19 of the Act.

1. Introduction

1.1. This document provides the following information regarding the reissue under clause 4 of Schedule 7 of the Act of the 146 HSNO approvals listed in Appendix 1:

- the reasons behind the decision to reissue
- the legislative criteria for reissue
- classification and control mapping
- transitional provisions
- consultation
- response from submitters
- substances to be reissued

2. Process

Reasons for reissue

2.1. The reasons for the need to reissue this batch of 146 approvals, and the process followed, are the same as those for previous approvals we have recently reissued².

- All approvals that were in force immediately before 1 December 2017 need to be reissued to take account of the legislative changes that occurred on that date when many HSNO workplace controls were transferred to the Health and Safety at Work regime; and
- The classifications assigned to the substances covered by these older approvals need to be updated to assign new hazard classifications in accordance with the new Hazardous Substances (Hazard Classification) Notice 2020.

2.2. The 146 approvals comprise:

- Explosives (8 approvals)
- Fumigants (13 approvals)
- Organophosphate and carbamate pesticides (69 approvals)
- 1080 (pure) and eleven 1080 formulations (12 approvals)
- Vertebrate toxic agents (44 approvals)

Legislative criteria for the reissue

2.3. These approvals are to be considered under clause 4 of Schedule 7 of the Act, which enables the EPA to review, amend and reissue the approvals. The reissue of approvals is for the purpose of updating the approvals to take into account the new classification system, and to revoke the existing prescribed controls to replace them with new controls, omitting any existing control if it is reasonable to conclude that the purpose of that control is to address the adverse effect on people in the workplace and any other aspect of the control is only incidental.

- 2.4. It is also necessary to consider other relevant sections of the Act, namely sections 4 to 8. These sections are the purpose of the Act, the principles and matters to consider in order to achieve the purpose of the Act and the requirement to exercise caution when managing adverse effects and take into account the principles of the Treaty of Waitangi.

3. Hazardous properties

- 3.1. On 15 October 2020, the EPA issued the Hazardous Substances (Hazard Classification) Notice 2020. This notice establishes a hazard classification for hazardous substances that incorporates elements of the Globally Harmonized System of Classification and Labelling of Chemicals (GHS 7) by reference, plus a new framework for terrestrial ecotoxicity classifications. Reissued approvals will be assigned new hazard classifications in accordance with the notice, and the controls will also be updated to bring them into line with the new legislation³ that came into force on 1 December 2017.
- 3.2. A correlation table that maps the previous HSNO alpha-numeric classifications to the new HSNO classifications is provided in Appendix 2. Both the old and new classifications for each approval reissued in this decision document are provided in Appendix 1.

4. Changes to controls on reissued approvals

- 4.1. The existing prescribed controls, being the controls that applied to the affected substances immediately before 1 December 2017, are set out in the various decision documents, Transfer Notices and for explosives, the Explosives Transfer Regulations⁴. The project team referred to these original approvals to ensure that the correct controls were applied to the reissued approvals.
- 4.2. The mapping of the existing prescribed default controls to new default HSNO controls and/or requirements under the HSW (HS) Regulations is set out in Appendix 3.

Fate of existing prescribed default controls that remain in HSNO

- 4.3. The following existing prescribed controls have been replaced by new default controls in EPA Notices:
- Controls specified under the Hazardous Substances (Classes 1 to 5 Controls) Regulations 2001 to protect the people outside of workplaces from substances with explosive, flammable or oxidising properties are replaced by controls specified in the Hazardous Substances (Hazardous Property Controls) Notice 2017.
 - Controls specified under the Hazardous Substances (Classes 6, 8, and 9 Controls) Regulations 2001 to protect the environment are replaced by controls specified in the Hazardous Substances (Hazardous Property Controls) Notice 2017.
 - Controls specified under the Hazardous Substances (Identification) Regulations 2001 are generally replaced by controls specified in the:
 - Hazardous Substances (Labelling) Notice 2017 for labelling requirements
 - Hazardous Substances (Safety Data Sheets) Notice 2017 for documentation requirements
 - Hazardous Substances (Hazardous Property Controls) Notice 2017 for controls relating to signage for substances that are hazardous to the environment

³ The Health and Safety at Work (Hazardous Substances) Regulation 2017 and a series of EPA Notices.

⁴ Hazardous Substances (Fireworks, Safety Ammunition, and Other Explosives Transfer) Regulations 2003

- HSW (HS) Regulations for controls relating to duties of persons in charge of workplaces, and for signage requirements for class 1 to 8 substances (refer section 4.4 below).
- Controls specified under the Hazardous Substances (Packaging) Regulations 2001 are replaced by controls specified in the Hazardous Substances (Packaging) Notice 2017.
- Controls specified under the Hazardous Substances (Disposal) Regulations 2001 are replaced by controls specified in the:
 - Hazardous Substances (Disposal) Notice 2017
 - Hazardous Substances (Labelling) Notice 2017 for information requirements
 - Hazardous Substances (Safety Data Sheets) Notice 2017 for documentation requirements
 - HSW (HS) Regulations for controls relating to duties of persons in charge of workplaces (refer section 4.4 below).
- Controls specified under the Hazardous Substances (Emergency Management) Regulations 2001 are replaced by controls specified in the:
 - Hazardous Substances (Labelling) Notice 2017 for information requirements
 - Hazardous Substances (Safety Data Sheets) Notice 2017 for documentation requirements
 - Hazardous Substances (Hazardous Property Controls) Notice 2017 for controls relating to emergency response plans, secondary containment and signage for substances that are hazardous to the environment
 - HSW (HS) Regulations for controls relating to emergency response plans, secondary containment and signage for class 1 to 8 substances in workplaces (refer section 4.4 below).

Fate of existing prescribed default controls transferred to HSW

4.4. The following existing prescribed controls intended to manage hazards arising in or from workplaces have been replaced by new default requirements under the HSW (HS) Regulations or a HSW Safe Work Instrument:

- Controls specified under the Hazardous Substances (Classes 1 to 5 Controls) Regulations 2001 to protect people from substances with explosive properties are replaced by requirements specified in Part 8 and Part 9 of the HSW (HS) Regulations.
- Controls specified under the Hazardous Substances (Classes 1 to 5 Controls) Regulations 2001 to protect people from substances with flammable properties are replaced by requirements specified in Part 8 and Part 10 of the HSW (HS) Regulations.
- Controls specified under the Hazardous Substances (Classes 1 to 5 Controls) Regulations 2001 to protect people from substances with oxidising properties are replaced by requirements specified in Part 8 and Part 12 of the HSW (HS) Regulations.
- Controls specified under the Hazardous Substances (Classes 1 to 5 Controls) Regulations 2001 to protect people from organic peroxides are replaced by requirements specified in Part 8 and Part 12 of the HSW (HS) Regulations.
- Controls specified under the Hazardous Substances (Classes 6, 8, and 9 Controls) Regulations 2001 to protect people from toxic and corrosive effects are replaced by requirements specified in Part 13 of the HSW (HS) Regulations.

- Controls for persons in charge specified under the Hazardous Substances (Identification), (Disposal) and (Emergency Management) Regulations 2001 are now specified in Part 2 of the HSW (HS) Regulations.
 - Controls for emergency response plans for class 1 to 8 substances specified under the Hazardous Substances (Emergency Management) Regulations 2001 are now specified in Part 5 of the HSW (HS) Regulations.
 - Controls for secondary containment for class 1 to 8 substances specified under the Hazardous Substances (Emergency Management) Regulations 2001 are now specified in Parts 10, 12, 13 and 17 of the HSW (HS) Regulations.
 - Controls for signage for class 1 to 8 substances specified under the Hazardous Substances (Emergency Management) Regulations 2001 are now specified in Part 2 of the HSW (HS) Regulations.
 - Controls on fire extinguishers specified under the Hazardous Substances (Emergency Management) Regulations 2001 are now specified in Part 5 of the HSW (HS) Regulations.
 - Controls specified under the Hazardous Substances (Compressed Gases) Regulations 2004 are now specified in Part 15 of the HSW (HS) Regulations.
 - Controls specified under the Hazardous Substances (Tank Wagon and Transportable Containers) Regulations 2004 are now specified in Part 16 of the HSW (HS) Regulations.
 - Controls specified under Schedules 8 and 9 of the Hazardous Substances (Dangerous Goods and Scheduled Toxic Substances) Transfer Notice 2004 are now specified in Part 17 of the HSW (HS) Regulations.
 - Controls specified under Schedule 10 of the Hazardous Substances (Dangerous Goods and Scheduled Toxic Substances) Transfer Notice 2004 are now specified in Part 11 of the HSW (HS) Regulations.
 - Controls specified under Schedule 12 of Hazardous Substances (Dangerous Goods and Scheduled Toxic Substances) Transfer Notice 2004 are now specified in Part 13 of the HSW (HS) Regulations.
- 4.5. There are certain controls that no longer apply to some substances because the requirement was removed when the existing prescribed control was replaced by one with a higher threshold in the HSW (HS) Regulations. These changes occurred on 1 December 2017. Examples include:
- For certain class 6 and 8 substances, the requirement for an approved handler was removed when the existing prescribed control was replaced by regulations 13.9 and 13.11 of the HSW (HS) Regulations. For class 2, 3, 4 and 5 substances the requirement for an approved handler was removed entirely. A certified handler is now required only for explosives, 6.1A (acute toxicity Category 1) and 6.1B (acute toxicity Category 2) substances, and any substance that requires a controlled substance licence. However, these regulations require that all substances comply with regulations 4.5-4.6 of the HSW (HS) Regulations which requires PCBUs to ensure that workers using hazardous substances are provided with appropriate information, training, instruction, and supervision specific to the substances used. Substances with 6.1C (acute toxicity Category 3) classifications are also subject to security requirements (regulation 13.10). Also of note is that 6.1C (acute toxicity Category 3) substances are restricted to workplace use only by clause 13 of the Hazardous Substances (Hazardous Property Controls) Notice 2017, along with specific notification and record-keeping requirements.

- For certain substances, the existing prescribed tracking requirement was replaced by Part 19 of the HSW (HS) Regulations. Under these regulations, tracking is no longer triggered by the 6.1C (acute toxicity Category 3) classification.
- Some of the substances, are organophosphate- or carbamate-containing substances that were included in the organophosphate and carbamate (OPC) plant protection insecticides reassessment held in 2013. One of the additional controls applied in that reassessment was a requirement for users to hold approved handler certification, in order to restrict and prevent the use of OPCs by untrained users in the home garden situation. This requirement for an approved handler was subsequently removed in the December 2017 legislative reform due to the higher threshold in the HSW (HS) Regulations. The substances were erroneously not included in Table 1 of Schedule 1 or Table 1 of Schedule 9 in the Hazardous Substances (Hazardous Property Controls) Notice 2017 when this notice came into force in December 2017, which creates a regulatory gap. Therefore, in the reissued OPC approvals, clause 13(1) of the Hazardous Substances (Hazardous Property Controls) Notice 2017 has been varied as if the substances were included in Table 1 of Schedule 1, so that the substances are restricted to workplaces only. In addition, clauses 60, 62, 63, and 64 of the Hazardous Substances (Hazardous Property Controls) Notice 2017 were varied where required as if the substances were included in Table 1 of Schedule 9, so that the qualification requirements for substances that are hazardous to the environment apply to all of these OPC-containing substances.

Fate of certain additional / varied controls

- 4.6. A number of additional / varied controls set in the original approvals do not need to be carried across into the reissued approvals because they are covered by the default provisions in one or more EPA Notices. Examples include:
- Measures to avoid significant adverse effects to the environment beyond the application area when applying pesticides that are hazardous to the environment are specified as a default control in the Hazardous Substances (Hazardous Property Controls) Notice 2017 (clause 46). Associated labelling provisions are specified as a default control in the Hazardous Substances (Labelling) Notice 2017 (clause 19);
 - The prohibition to apply a substance that is hazardous to the aquatic environment directly into or onto water is a default control in the Hazardous Substances (Hazardous Property Controls) Notice 2017 (clause 52). Associated labelling provisions are specified as a default control in the Hazardous Substances (Labelling) Notice 2017 (clause 20);
 - Measures to protect invertebrate pollinators from substances that are hazardous to terrestrial invertebrates are specified as a default control in the Hazardous Substances (Hazardous Property Controls) Notice 2017 (clause 58). Associated labelling provisions are specified as a default control in the Hazardous Substances (Labelling) Notice 2017 (clause 24). Variations to this control (such as the setting of non-contact periods) are now set as variations to clause 58 of the Hazardous Substances (Hazardous Property Controls) Notice 2017; and
 - The requirement for labels to include information on any application restrictions and buffer zone distances set for an agrichemical are specified as a default control in the Hazardous Substances (Labelling) Notice 2017 (clause 25). Application restriction controls are set as a variation to clause 50 of the Hazardous Substances (Hazardous Property Controls) Notice 2017, and buffer zone distance controls are set as a variation to clause 51 of the Hazardous Substances (Hazardous Property Controls) Notice 2017.

4.7. A number of additional / varied controls set in the original approvals do not need to be carried across into the reissued approvals because they are workplace controls that have been replaced by new requirements in regulations under the HSW (HS) Regulations or a HSW Safe Work Instrument.

Examples include:

- Additional or varied controls relating to personal protective equipment (PPE) are replaced by requirements specified in Part 13 of the HSW (HS) Regulations (Regulations 13.8) as well as within the Health and Safety at Work (General Risk and Workplace) Regulations 2016.
- Additional controls relating to restricted entry intervals and associated signage are replaced by requirements specified in Part 13 of the HSW (HS) Regulations (Regulations 13.23-13.25).
- Additional controls on fumigants are replaced by requirements specified in Part 14 of the HSW (HS) Regulations, and also in a HSW Safe Work Instrument.

4.8. Other than situations such as those described above, the general approach was to retain any additional / varied controls that were set on the original approval. In many cases, the wording of these controls needed to be modified due to changes in the legislative instruments that are now in effect compared to those that were in effect when the substance was originally approved. Some changes were also made to make the wording of some controls consistent across multiple approvals.

Other considerations

4.9. In regards to decision-making, it is also necessary to consider other relevant sections of the Act, namely sections 4 to 8. These sections are the purpose of the Act, the principles and matters to consider in order to achieve the purpose of the Act and the requirement to exercise caution when managing adverse effects and take into account the principles of the Treaty of Waitangi. However, the process to reissue an approval is entirely administrative in nature. In particular, there is no risk assessment involved in this process. Therefore, there are no additional matters to consider arising from these sections.

4.10. After all these matters have been considered, the list of controls that applies to each of the substances following reissue is set out in the Appendices of each of the reissued approvals.

5. Transitional provisions

5.1. Transitional provisions are included in the EPA Notices for Labelling, Safety Data Sheets and Packaging. Specifically, a four year transitional period applies from the date the approval is reissued. The deadline for compliance with these notices is therefore 30 April 2025.

5.2. This transitional period is considered sufficient time to allow industry to update their labels, safety data sheets and packaging in order to comply with any updated requirements.

5.3. During the transitional period, a person must either comply with the controls under the previous approval, or the controls set in the relevant EPA Notices as amended in 2020.

5.4. No transitional period has been provided for the Hazardous Substances (Disposal) Notice 2017 or the Hazardous Substances (Hazardous Property Controls) Notice 2017. The requirements in these notices must be complied with from the date the approval is reissued.

6. Consultation

- 6.1. The list of the individual approvals proposed for reissue or revocation, along with their new classifications, was included in Appendix 6 to the consultation document released on 8 June 2020. Feedback was requested on the proposed GHS classification assigned to each approval, and on the proposal to reissue or revoke each approval. The consultation closed on 4 August 2020.
- 6.2. A total of twenty-eight submissions were received. Some of these submissions queried potentially incorrect mapping of existing classifications to the new classification for some substances. The project team investigated each of these concerns, and where required, made appropriate changes to the new classifications. Full details of the changes made are provided in the submission analysis report for this consultation, which is available on the EPA website⁵.
- 6.3. This submission report also summarises submitters' comments on each the five proposals included in the consultation document, and provides the EPA's response and recommendations.

7. Information available for consideration

- 7.1. The information available for this consideration includes:
 - A list of substances to be reissued
 - Their old and new classifications
 - Information on the mapping of controls
 - Their new approvals documents.

8. Decision

- 8.1. Pursuant to clause 4 of Schedule 7 of the Act, I have considered the reissue of the 146 approvals listed in Appendix 1.
- 8.2. I have considered the matters raised in sections 4 to 8 of the Act, but, given the nature of the reissue is administrative, there are no further considerations required in order to achieve the purpose of the Act.
- 8.3. I consider it appropriate to reissue the approvals listed in Appendix 1 with the controls set out in the individual reissued approval documents in accordance with clause 4 of Schedule 7 of the Act. Therefore the new approvals are now made either under section 29 of the Act (for deemed approvals) or under the section it was originally granted (for Part 5 approvals), in accordance with clause 4(5) of Schedule 7, and Schedule 7 no longer applies to the new approvals. Given the hazard classification system came into effect on the 30 April 2021, this decision will have immediate effect.

Decision to Reissue Approvals

- 8.4. The transitional provisions of the relevant EPA Notices apply to the reissued approvals for the transitional period which begins on the date of reissue and ends on 30 April 2025.

9.1C	hazardous to the aquatic environment chronic Category 3
9.1D	hazardous to the aquatic environment chronic Category 4 Note: hazardous to the aquatic environment acute Category 2 and acute Category 3 have not been adopted
Hazardous to the terrestrial environment	
9.2A, 9.2B, 9.2C, 9.2D	hazardous to soil organisms
9.3A, 9.3B, 9.3C	hazardous to terrestrial vertebrates
9.4A, 9.4B, 9.4C	hazardous to terrestrial invertebrates
9.1D (designed for biocidal action)	designed for biocidal action

Appendix 3: Mapping of controls

The existing prescribed default controls that applied to the substances immediately before 1 December 2017 are shown in Table 3 beneath the heading “Original HSNO controls”. The columns beneath the heading “New HSNO controls” show the default HSNO controls that apply following the reissue. Details of these controls can also be found in the new approval documents for each reissued substance). The columns beneath the heading “New HSW requirements” show which Health & Safety at Work (Hazardous Substances) regulation applies. These are listed here for information purposes only.

Table 3 Mapping of existing prescribed default controls to new default controls that will apply to reissued substances
