Form 4: Post-activity report

Regulation 11(d), Exclusive Economic Zone and Continental Shelf (Environmental Effects–Permitted Activities) Regulations 2013

How to use this form:
This form should be completed by persons who have carried out a permitted activity (other than seismic survey) as defined in the Exclusive Economic Zone and Continental Shelf (Environmental Effects-Permitted Activities) Regulations 2013. It fulfils the post-activity report requirements of Schedule 4 of the Regulations.

This form must be provided to the Environmental Protection Authority (EPA) within 60 working days of completion of the activity.

Note: Items marked in italics are non-compulsory fields; however, inclusion of this information will assist the EPA in processing this form.

Please note that this completed form, once received and processed by EPA, will be posted on the EPA website.

Submitting in hard copy:
If you wish to provide this form in hard copy, please post your completed form to: Environmental Protection Authority, Private Bag 63002, Wellington, 6140.

Submitting electronically:
If you wish to provide this form electronically, please email your form to: eez.compliance@epa.govt.nz

Any form submitted electronically should be attached to an email that sets out:
- The details of the person undertaking the permitted activity (the operator);
- The name of the person supplying the completed form; and
- A statement that the person is authorised to supply the form on behalf of the operator.

Note: there is an 8 MB limit on electronic files submitted via email.

All forms prescribed by the Exclusive Economic Zone and Continental Shelf (Environmental Effects – Permitted Activities) Regulations 2013, as well as suggested templates for providing other information, may be viewed and downloaded from our website at www.epa.govt.nz or requested by contacting us:

**General description of permitted activity**

| Type of activity:         | marine scientific research |
| (e.g. marine scientific research, prospecting) |                      |
| Period during which activity was undertaken: | 9 November - 1 December 2016 |

**Location of permitted activity**

| Co-ordinates of area where activity was undertaken: (latitude and longitude) | Within 4000m of OI-2 wellhead location at general coordinates as follows:  
WGS 1984  
Northern Control site is approximately 13 km southeast of the OI-2 wellhead location at general coordinates as follows:  
Southern Control site is approximately 51 km south-southwest of the OI-2 wellhead location at general coordinates as follows:  

**Details of environment of area where activity undertaken**

**General description of the environment:**

The benthic environment at all survey locations comprises homogenous soft mud actively swept by currents, with no hard substrate or large biogenic structures. No sensitive species or habitats have been identified in or around the sampling area.
Description of any sensitive environment that was encountered in the area where the activity was undertaken:

No sensitive environments in the areas in which the activities were undertaken.

Environmental footprint of activity

| Estimation of the volume of material removed: | 1.74 m³ |
| Estimation of the areas of seabed affected by each component of, or sample taken as part of, the activity (m²): | 17.4 m² |

Details of measures taken to avoid, mitigate, or remedy adverse effects on the sensitive environment

Did you implement the contingency plan submitted to the EPA?

Yes / No*

Explain: No

Provide details of, and the reasons for, the measures taken to avoid, mitigate, or remedy the effects of activity:

A reduced benthic survey and epibenthic video sled recording proposal has been accepted by Maritime New Zealand for the Post drilling monitoring (which included Oi-1, Oi-2 and Pateke-4H) that will reduce the seabed and epibenthic sampling required, resulting in a reduction in contact with the seabed.

* Select One
